

## CPS SUPERVISOR LIMITED BUNDLE COMMUNICATION

OCFS is pleased to announce an enhancement to CONNECTIONS Security Business Functions (BF). Starting, Wednesday, June 20th, there will be a new CONNECTIONS Business Function Bundle called CPS SUP LIMITED. This BF will be different from the current CPS SUPERVISOR BF because it excludes three of the security attributes. The CPS SUP LIMITED BF Bundle WILL NOT contain, VIEW SENSITIVE, MAINTAIN STAFF, or MAINTAIN UNIT. The removal of these security attributes will allow districts to better control who has the ability to modify staff and units, and better segregate who can view a case that has been marked sensitive, while still providing a BF Bundle that addresses the other needs of a CPS Supervisor. Any district can choose to use the new CPS SUP LIMITED BF instead of the CPS SUPERVISOR BF if they want the more refined set of security attributes. If districts choose to use the CPS SUP LIMITED BF, they will have to un-assign the CPS SUPERVISOR BF and replace it with the CPS SUP LIMITED BF for the affected staff. The new BF will take effect the next time the user logs on to CONNECTIONS. You should not assign both of these BF Bundles to any single staff person.

CPS SUPERVISOR and CPS SUP LIMITED BFs include the following security attributes:

**View Sensitive-**  Allows users without a role to view sensitive case 'basic information' from the case and person search result. It is recommended that this Business Function be assigned to a small subset of individuals and must be given in combination with the CASE/PERS SRCH Business Function.

**Maintain Staff-** Allows users to access the Staff Dialog- with the ability to add, modify and delete staff information for their own district. The assignment recommendation has traditionally been: to give the Business Function to an individual in each unit, such as the unit supervisor or unit maintainer.

**Maintain Unit-** Allows users to access the Unit Dialog with the ability to add, modify and delete unit information for all of the units in their district. The recommendation has traditionally been to assign this Business Function to an individual in each unit, such as the unit supervisor or unit maintainer.
