

## Supervision and Treatment Services for Juveniles Program (STSJP) Youth Served by Domain

Use this decision grid to determine the appropriate response options for the youth served in your program.

- 1 First, identify whether the program was approved on your Municipality's STSJP Annual Plan as a Family Support Services (FSS) program.
- 2 Next, identify the funding streams and service domains approved for your program.
- 3 Finally, identify the youth's case type. STSJP and STSJP-RTA funded services address the needs of youth who are at risk of becoming, alleged to be, or adjudicated/convicted for a variety of case types: Persons in Need of Supervision (PINS), Juvenile Delinquents (JDs), both Raise the Age (RTA) and non-RTA, Juvenile Offenders (JO), Adolescent Offenders (AO), and Youthful Offender (YO) findings. Note that alleged JOs and AOs with caess removed to Family Court are reclassified as JDs (non-RTA and RTA, respectively).
  - ▶ For prevention services, where a youth is at risk of system involvement, use their presenting risk factors to select a case type (e.g., truancy and missing curfew suggest the youth is at risk of becoming a PINS; police contact with no arrest suggests the youth is at risk of becoming a JD). If there is no clear indication of factors, select the lowest type.
  - ▶ **New for PY2022-23.** As of December 29, 2022, children under 12 years of age who do not meet the definition of a JD and whose behavior, but for their age, would bring them within the jurisdiction of the family court under Article 3 of the Family Court Act, are eligible for services in the Prevention and Early Intervention domains under STSJP funding; this includes qualified FSS programs. Enter these youth as being at risk of becoming PINS.
  - ▶ Alleged JOs and AOs engaged in Voluntary Assessment and Case Planning Services (VACPS), who have not been referred to detention, are eligible for services under the Early Intervention domain.
